

POWERFUL, BROAD-SPECTRUM CONTROL OF ANNUAL BROADLEAF WEEDS

Argos herbicide delivers superior preemergence and postemergence control of annual broadleaf weeds in sorghum, field corn, sweet corn, yellow popcorn and other labeled crops.

Argos is a top performer in defeating tough broadleaf weed competitors including triazine-, glyphosate-, PPO- and ALS-resistant species. It provides excellent application versatility, strong tank mix compatibility and integrates seamlessly into a wide range of crop rotations.

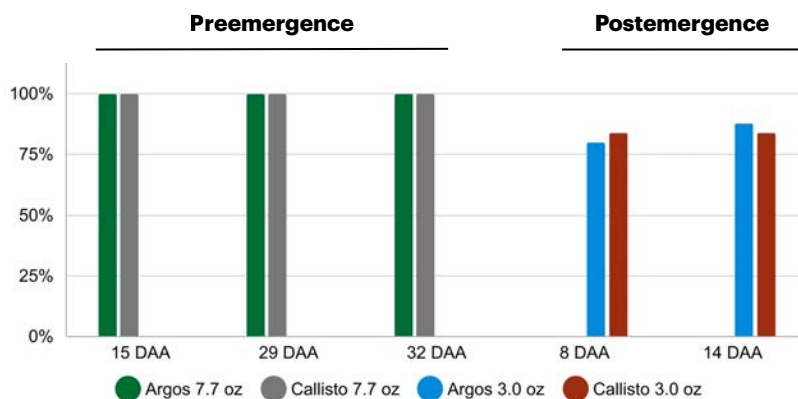

ARGOS

Get better yield performance with Argos, the herbicide with a long-lasting residual and flexible application methods (ground or aerial, see label).

It's also a great tank mix partner and can be used to control damaging weeds for a variety of row and specialty crops.

ARGOS COMPARED TO CALLISTO® - CORN (PREEMERGENCE AND POSTEMERGENCE)

% Waterhemp Control in Corn

Urbana, IL. Applications: Preemergence: May 22. Postemergence: June 15.

PERFORMANCE BENEFITS

- Broad-spectrum control with systemic and residual activity
- Flexible application use
- Low use rate with excellent crop safety features
- Tank mix partner of choice for use with most corn herbicides

Sorghum

Sugarcane

PRIMARY WEEDS CONTROLLED (OR SUPPRESSED)

Atriplex, Broadleaf Signalgrass, Buffalobur, Burcucumber, Canada Thistle, Carpetweed, Chickweed, Cocklebur, Common Sunflower, Curly Dock, Dandelion, Florida Pusley, Galinsoga, Hemp Sesbania, Horsenettle, Jimsonweed, Kochia, Lambsquarters, Large Crabgrass, Maretail, Morningglory (entireleaf, ivyleaf, pitted), Nightshade (black, eastern black, hairy), Palmer Amaranth, Pigweed (redroot, smooth, tumble), Pokeweed, Prickly Sida/Teaweed, Prostrate Knotweed, Ragweed (common, giant), Smartweed (ladythumb, pale, Pennsylvania), Velvetleaf, Venice Mallow, Volunteer Potatoes, Waterhemp (common, tall), Wild Buckwheat, Wild Carrot, Wild Mustard, Yellow Nutsedge

ARGOS + ATRAZINE

Argos can be tank mixed with atrazine on corn, grain sorghum and sugarcane to improve control of certain weed species.

Refer to label for recommended rates and application timing according to weed height.

Brand Name Argos

Category Herbicide

Active Ingredient Mesotrione

Crops Corn (field, seed, sweet, yellow popcorn), sorghum and more (comprehensive list at left)

Site of Action Group 27

Formulation Suspension concentrate

AI/Gallon Mesotrione 4.0 lb a.i./gal

Applications Preemergence
Postemergence

Rates Preemergence: 6.0 - 7.7 fl oz/A (see label for rates by crop)
Postemergence: 3.0 fl oz/A (see label for rates by crop)

Weed Spectrum Broadleaf species

Signal Word Caution

APPLICATION RATES AND GUIDELINES - CORN

Tank mixing allowed with approved preemergence grass herbicides and burndown, PRE and POST broadleaf herbicides.

ARGOS USE RATES

Preemergence Rates

Alone: 6.0 - 7.7 fl oz/A Tank
Mix: 5.3 - 7.7 fl oz/A

Postemergence Rates

Alone: 3.0 fl oz/A
Tank Mix: 3.0 fl oz/A

Preemergence Burndown Tank Mixtures: To improve broadleaf weed control with limited residual control prior to planting corn and before corn emergence, apply Argos at 3.0 fl oz/A in tank mixes with Reviton®, paraquat products like Helmquat, and glyphosate brands like Roundup®, dicamba and/or 2,4-D.

Postemergence Restrictions:

- Only one post application allowed if Argos is applied preemergence.
- Do not exceed a total of two applications per year.
- Do not exceed 3.0 fl oz in a single post application.
- Do not exceed a total of 7.7 fl oz/A per year.
- Do not make 2nd application within 14 days of the first application.
- Do not exceed a total of 6.0 fl oz/A for two post applications.
- Do not harvest forage/grain/stover within 45 days after application.
- If a post application of Argos is planned on ground that received a preemergence treatment of another mesotrione herbicide, Argos must be tank mixed with atrazine.
- If mixing Argos with atrazine, do not apply to corn taller than 12".
- Corn may be treated up to 30" tall or up to the 8-leaf stage of growth.
